

UI/UX Evaluation - Practice Information Card

(<https://practiceinformationcard.medcity.net/>)

High-level overview of current design weaknesses and re-design improvements for the Practice Information Card application.

Current Design Weaknesses

General Issues

- **Practice search is not intuitive and time consuming** - no real-time search results suggestions, bulky table with search results.
- **No direct provider access** - user needs to navigate through the practice page first.
- **No back navigation** - user cannot return to previous page.
- **Layout of the practice page is too bulky** - too much information on one page.
- **Multiple accessibility issues** - color contrast, broken ARIA references, etc.
- Not mobile-friendly.

Home Page

- Excessive white space.
- No guidance for search: what user should type, how many characters, etc.
- No real-time search result suggestions.
- Table with search results - overwhelming data, no value in sorting feature.

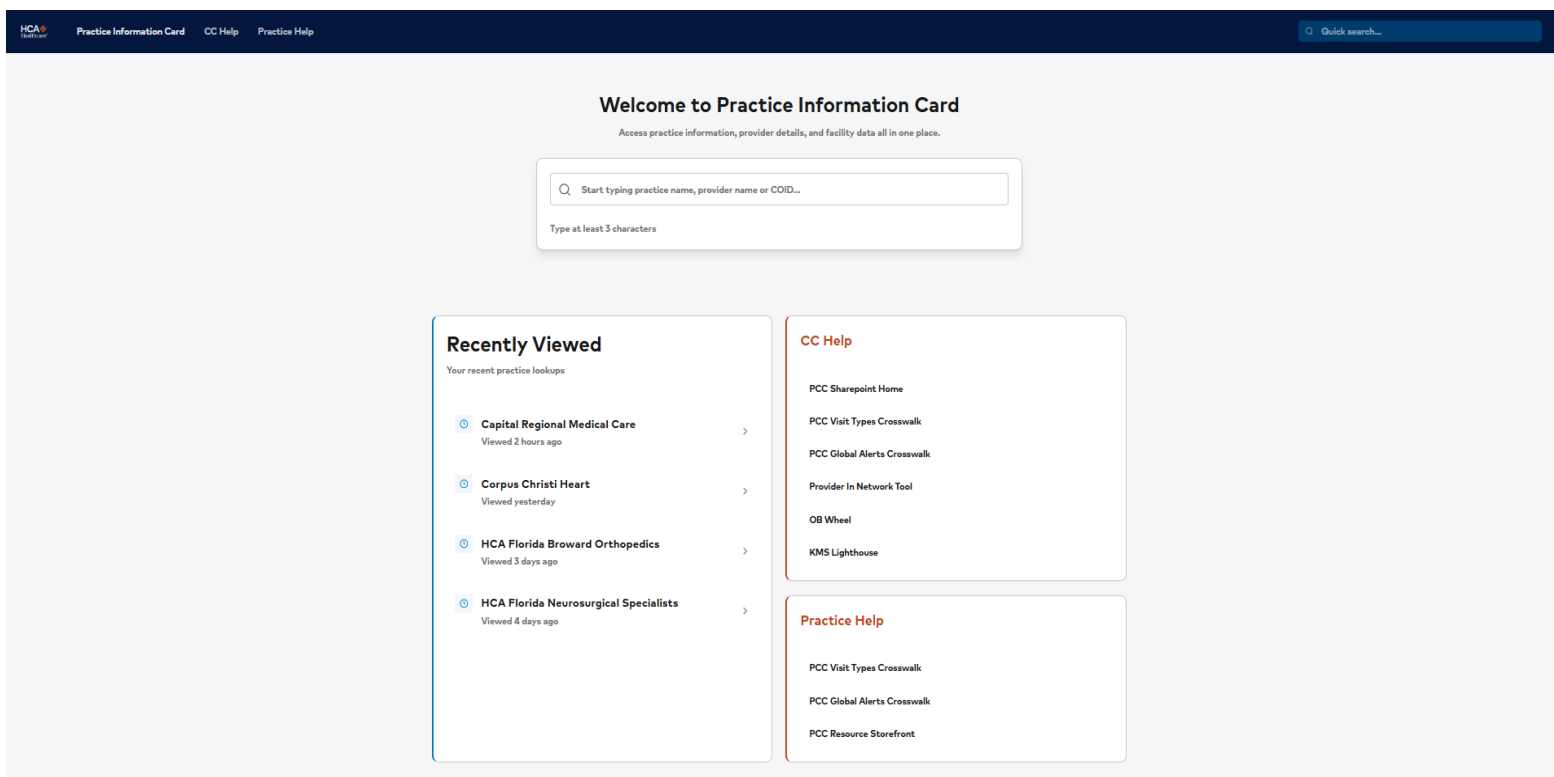

Practice Page

- Dense tables -> poor scanability.
- Unclear hierarchy of the elements.
- Crucial practice information is hidden or difficult to find - address, hours, website link.
- Providers table does not have clarifying headers, no color legend.
- Provider details appear on the same page – too messy.

Re-design Ideas & Improvements

Home Page Re-design

- No excessive white space.
- Sub-title explains the purpose of the application.
- Search bar with helper text ('Type at least 3 characters') and a more descriptive placeholder ('Start typing practice name, provider name or COID') for a more intuitive search.
- 'Recently Viewed' practices displayed in a separate section.
- Quick access to help resources in card layout.

Search Experience Re-design

- Autosuggest dropdown after typing 3 characters.
- Categorized results (Clinics, Providers, COID).
- Quick filter chips for narrowing results (All, Clinics, Providers, COID).
- Direct provider access without navigating through clinic page.

Welcome to Practice Information Card

Access practice information, provider details, and facility data all in one place.

Practice Page Re-design

- Header card with key metrics and prominent alert box in red.
- Tabbed navigation for Providers, Sites, Practice Details.
- Provider cards with status badges and quick filters.
- Card layout to make information easier to scan.
- Breadcrumbs for clear navigation.

Key Improvements of Re-Design

- **Modern, clean layout** with clear visual hierarchy and card-based design.
- **Faster, easier and more intuitive practice search.**
- **Real-time search with autosuggest** and categorized results (Clinics, Providers).
- **Quick filters** for narrowing search results (Clinic Only, Provider Only, COID Only).
- **Direct provider access** from search results without navigating through clinic pages.
- **Breadcrumb navigation** for clear page hierarchy and easy back navigation.
- **Tabbed interface** on Practice pages for organized content (Providers, Sites, Practice Details).
- **Provider cards with status badges** on the Practice pages.
- **Separate page for the Provider information** with a clean card-based design.
